

Evgeny Ivanov

2015

Liège, Belgium

University of Liège

I was impressed how many leading people in science were involved in POMOR; how much attention was paid to us in order to make us feel well during the education process. In addition, a generous scholarship provided by partner organizations and ministries allowed us to organize a summer practice and to spend one semester in Germany. The contacts and friendships I made during my time in the program allowed me after graduation to launch a career in one of the best universities in Western Europe. From my current stand, applying for POMOR Master program was one of the best decisions I've made in my life.
