

Module 5 Processes in the coastal zone and environmental management

Module Coordinators:

Prof. Dr. Konstantin Klokov, Saint Petersburg State University

Prof. Dr. Bodo von Bodungen, Leibniz Institute for Baltic Sea Research Warnemuende

Courses:

- 5.1. Statistical analysis of spatial data (Geostatistics); L, P
- 5.2. Eutrophication, monitoring, assessment, management; L, S
- 5.3. Marine environmental law; L, S
- 5.4. Engineering in the coastal zone and numerical modelling of coastal processes; L, S
- 5.5. Modern approaches towards environment management: co-management; L, S
- 5.6. Indigenous population and industrial development in Arctic areas: impact assessment and sustainable development strategies; L, S
- 5.7. Integrated water management systems for the Arctic and sub-arctic regions; L, S, P
- 5.8. Decision support tools and forecasting; L, P, S
